

DNA–binding (experimentally determined)

Interaction with CCAR2 {ECO:0000269|PubMed:257328}

Interaction with HRMT1L2. {ECO:0000269|PubMed:1518}

Transcription activation (acidic).

Interaction with WWOX

Interaction with HIPK1. ECO:0000250.

Required for interaction with ZNF385A. {ECO:000026}

Required for interaction with FBXO42. {ECO:0000269}

interaction with AXIN1 ECO:0000250.

interaction with the 53BP2 SH3 domain.

interaction with E4F1. {ECO:0000269|PubMed:1064499}

interaction with DNA

interaction with CARM1. {ECO:0000269|PubMed:151867}

interaction with HIPK2.

Oligomerization.

Interaction with USP7

Basic (repression of DNA–binding).

TAD I

TAD II

Bipartite nuclear localization signal.

Nuclear export signal.

[KR]–[STA]–K motif.
