

- DNA-binding (experimentally determined)
- Interaction with CCAR2. {ECO:0000269|PubMed:257328}
- Interaction with HRMT1L2. {ECO:0000269|PubMed:1518}
- Transcription activation (acidic).
- Interaction with WWOX
- Interaction with HIPK1. ECO:0000250.
- Required for interaction with ZNF385A. {ECO:000026}
- Required for interaction with FBXO42. {ECO:0000269}
- interaction with AXIN1. ECO:0000250.
- interaction with the 53BP2 SH3 domain.
- interaction with E4F1. {ECO:0000269|PubMed:1064499}
- interaction with DNA
- interaction with CARM1. {ECO:0000269|PubMed:151867}
- interaction with HIPK2.
- Oligomerization.
- Interaction with USP7
- Basic (repression of DNA-binding).
- TAD
- TADII
- Bipartite nuclear localization signal.
- Nuclear export signal.
- [KR]-[STA]-K motif.
