

Figure 1: A plot showing the distribution of genes in the "clus2" cluster. The x-axis is "Gene List Index" (0 to 18646) and the y-axis is "Number of genes" (0 to 27). A blue line shows the cumulative distribution, with a "Zero crossing at 8614" and a "Peak at 15554". A green shaded area represents the "clus2" cluster, and a red shaded area represents the "NON.clus2" cluster. A vertical green line marks the zero crossing at 8614, and a vertical red line marks the peak at 15554.
