

Figure 1 displays the distribution of genes in the "clus2" cluster. The top panel shows the cumulative distribution function (CDF) of the Gene List Index, with a peak at 4038 and a zero crossing at 10533. The middle panel shows the barcode plot, and the bottom panel shows the density plot of the Gene List Index. The x-axis represents the Gene List Index, ranging from 0 to 18197 (in list) and 81 (in gene set).
