

Figure 1: A plot showing the distribution of genes across the Gene List Index. The top panel shows a red line representing the cumulative distribution, peaking at 1812 and crossing zero at 8081. The bottom panel shows a green area representing the density of genes, with a peak at 1812 and a zero crossing at 8081. The x-axis is labeled 'Gene List Index' and ranges from 0 to 15000. The y-axis is labeled 'Number of genes: 18169 (in list), 80 (in gene set)'.
