

Figure 1: A plot showing the distribution of genes in the "clus2" cluster. The x-axis is "Gene List Index" (0 to 18646) and the y-axis is "Number of genes" (0 to 29). A blue line shows the cumulative distribution, which is zero until index 8724, then rises sharply to a peak at index 11758, and then declines. A green shaded area at the bottom represents the density of genes. A vertical green line marks the "Zero crossing at 8724" and a vertical blue line marks the "Peak at 11758". The plot is labeled "clus2" and "NON.clus2".
